Title of book: The Curious Garden
By Peter Brown

“One boy’s quest for a greener world ... one garden at a time!”

Book Review: This is story about a young boy who discovers a struggling garden in the middle of a dark, bleak, and dirty city. As the boy learns how to become a gardener, he and his ‘curious garden’ literally transform the city into a lush green world.

The reason why I love this book so much is that it reminds me how Vancouver changes every spring – from a city that is dreary and wet, into a lush green paradise.
